I, Maria Lalioti, a citizen of Greece, declare that:

B.Sc. in Biology; University of Athens, Greece; 1991  
M.Sc. Reproductive Biology; University of Geneva, Switzerland; 1993  
M.Sc. Medical Biology; University of Geneva, Switzerland; 1994  
Ph.D. Human Genetics; University of Geneva, Switzerland; 1998  
Postdoc Biochemistry; University of Birmingham, UK; 2001  
Postdoc Human Genetics; Yale University School of Medicine; USA; 2005

Current position: Assistant Professor, Yale University School of Medicine,  
Department of Obstetrics, Gynecology and Reproductive Sciences.

That I have read and understood the specification of US patent application  
09/508,658.

At the time that the priority application FI 973762 was being prepared for filing,  
a typographical error was made. The error that was made appears in the published  
specification of the PCT application (publication number WO99/15559) at page 5, line 24  
and page 8, lines 26-27. The error is that the mutation is incorrectly positioned at amino  
acid 42 and is also incorrectly identified as the mutation K42E. The mutation is in fact at  
amino acid position 83 and it is mutation K83E (83 for the amino acid at position 83).

The inventors noted the mistake in the description only when they were  
submitting the manuscript for the article "Positional cloning of the APECED gene",

Nature Genetics, 1997 Dec; 17(4):393-8). A copy of the article is attached. The article was published after the filing of Finnish patent application FI 973762.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statement may jeopardize the validity of the application or any patent issued thereon.

Signed this 30 day of May 2006
